

# International Journal of Fuzzy Systems: Special Issue

## Advanced Automation Systems Using Fuzzy Theory (Automation 2015)

There are some requirements for the conference papers selected from Automation 2015 for possible publication in IJFS special issue:

1. Since the authors are required to sign a Copyright Form for publishing their papers in IJFS, the IJFS papers in the special issue should have 40% more materials than the papers in the conference proceeding.
2. All papers, which are recommended by the conference and submitted to the special issue, should be related to fuzzy systems and submitted to the IJFS official review system. The review process of the papers will be handled by the related associate or guest editors of the IJFS. The editors will make the final decision to accept the paper or to reject it.
3. Finally, to cover part of the cost of the publication, the author's company or institution will be approached with a request to pay the publication fee US\$ 200 (NT\$ 6000).
